

09 Childcare practice procedures

09.05 Establishing children's starting points

When children start at the pre-school they arrive at different levels of learning and development. In order to help them to settle and make rapid progress it is important that they are provided with care and learning opportunities that are suited to their needs, interests and abilities. This means establishing and understanding their starting points and whether there are any obstacles to their learning, so that teaching can be tailored to the 'unique child'.

- The aim of establishing a child's starting points is to ensure that the most appropriate care and learning is provided from the outset.
- Starting points are established by gathering information from the first contact with the child's parents/carers at induction and during the 'settling in' period. Staff do not 'wait and see' how the child is settling before they begin to gather information.
- The key person is responsible for establishing their key children's starting points by gathering information in the following ways:
 - observation of the child during settling in visits
 - discussion with the child's parents/carers
 - building on information that has been gathered during registration by referring to the 09.01b Little Doves Registration Sessions Requested and Permission Form.

The information gathered is recorded within two weeks of the child's official start date and sooner where possible.

- The key person makes a 'best fit' judgment about the age band the child is working in, referring to Development Matters or Birth to Five Matters.
- The key person should complete details by indicating where they have gathered their evidence from, using more than one source where possible i.e. parent/carer comment and observation during settling in.
- The key person will complete either a two year old starting check or a three and four year old starting check.

If the initial assessment raises any concerns that extra support may be required, procedure 09.12 Identification, assessment and support for children with SEND is followed.
